Fictional evidence exercise

TRAINING ONLY - NOT A TEST CERTIFICATE OR APPROVAL

Purpose

Practise retaining original evidence, linking an attachment to a claim and discussing its limitations. This sheet contains no real inspection results.

Training reference

TRAINING-NBE-E01. Relates to the fictional shared barrier TRAINING-NBE-B01 and claim C2: isolation performs its required safety function.

Scenario

The investigation team cannot locate a current verification record for the transfer isolation barrier. Its recorded condition remains Unknown. This evidence challenges the sufficiency of the case; it does not demonstrate that the barrier is available.

Learner tasks

Upload this PDF and link it to claim C2. Record the missing verification evidence as a challenge. Identify the controlled performance standard, responsible reviewer and evidence needed to resolve the gap. Do not mark the claim Supported on the basis of this sheet.

Integration exercise

Use the existing transfer-hose training assessment to discuss findings, bowtie controls and assurance actions. Record specific applicable finding and action references after review. Any linked assessment revision change should prompt reassessment.

Decision boundary

No operating limit, test interval, risk acceptance or permission to operate is established by this fictional exercise. A competent team must determine the actual requirements for a real facility.
